## GET DESKTOP ACCESSORY ZIPFILES

*Quick 'n' Easy AppleWorks Templates*

**Desktop Accessory ZipFiles** is our most popular product. This set includes

- **Flash Pad**
- **KwikEnvelope**
- **Calendar**
- **Sleeve List**
- **Scientific Calculator with Trig Functions**

**Flash Pad** is an AppleWorks spreadsheet file (we call it a ZipFile) that loads and operates like any other AppleWorks file.

***Q: What does Flash Pad have in common with Pinpoint® ?***

A: Flash Pad has:

- a calculator
- a calendar, good thru 1999.
- an address file
- a phone list
- a quick envelope labeler
- a note pad

***Q: What has Pinpoint® got that Flash Pad hasn't got?***

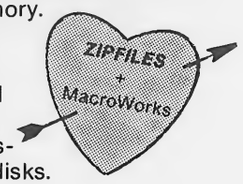
A: A telephone dialer and a graphics merge function, and A PRICE TAG OVER 4 TIMES HIGHER.

***Q: Why is Flash Pad compatible with MacroWorks® while Pinpoint® is not?***

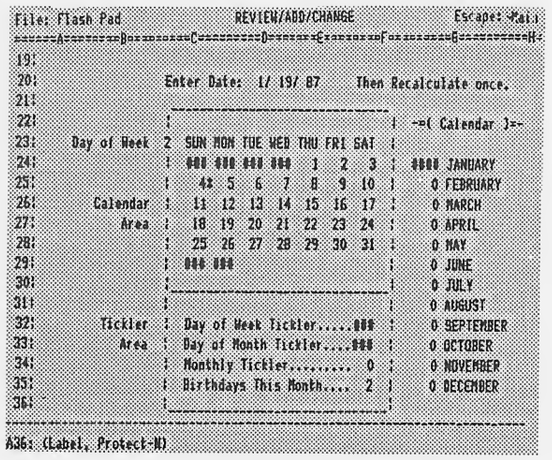
A: Pinpoint® is a "memory resident" program, just like MacroWorks®. Unfortunately, both programs use the same part of memory, so AppleWorks cannot use both at once.

Flash Pad, however, is a standard AppleWorks file, and does not compete with MacroWorks® for space in memory.

More powerful than Pinpoint® or Jeeves®, these spreadsheet ZipFiles load just like any other AppleWorks file, with no confusing instructions to swap disks.



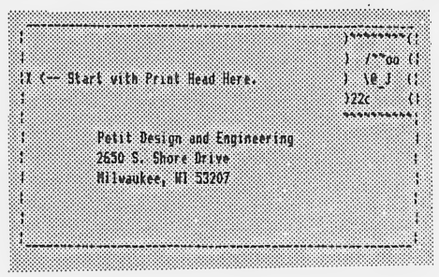
***Q: What has Flash Pad got that Pinpoint® hasn't got?***



A: Flash Pad has these unique functions:

- Flash Pad's calendar has four kinds of ticklers, to remind you of important things when you type in today's date.
- Flash Pad's calculator reads out in decimal or scientific notation.
- Flash Pad has a task list you can prioritize or rearrange just like a data base.

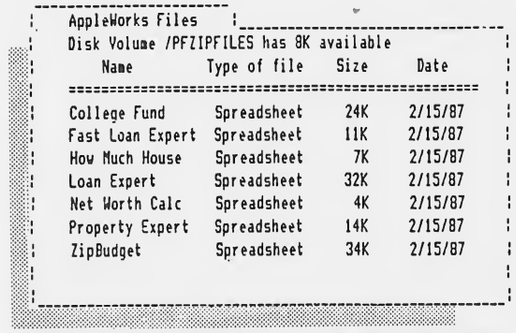
**KwikEnvelope** is a ZipFile for addressing envelopes flawlessly. Also has an Address List to store your most frequently used addresses for quickly labeling your envelopes.



**"...an interesting concept. Keep up the good work!"** D.S., California

**Calendar** lets you generate a 12-month calendar for any year through 1999 A.D. Use it to record messages and remind yourself of birthdays, appointments, and meetings. Just position your cursor on the asterisk and read your reminder at the bottom of the screen!

**Sleeve List** is used to set up your dot matrix printer for listing files from any disk using the screen dump function. The list will be just the right width to fit into the disk sleeve — a neat and handy reference.



Now you can have your desktop accessories and use MacroWorks® or AutoWorks® at the same time. At a fraction of the cost.

Title: Eternal Punishment
Type: story
Source: James Baker III
Themes: just rewards
ID: 60

I had a terrible dream last night. The President, the Speaker of the House and the chairman of the Federal Reserve passed away and appeared in St. Peter's waiting room. A voice came over the intercom telling the President to go to Room One. There he saw a huge gorilla. The voice said, "Ronald Reagan, you have sinned, and must spend eternity with this gorilla."

Tip O'Niell was sent to Room Two, where he found a mad dog.

"Mr. Speaker," the voice declared heavily, "You have sinned and must spend eternity with this mad dog."

Then Paul Volcker was directed to Room Three, where, to his surprise, he found Bo Derek. Over the intercom the voice came: "Bo Derek, you have sinned..."

Response: excellent

Best of all, it lets you print in 3" x 5" card format.
